Silver Falcon Mining, Inc's (SFMI)

Drilling Hits New Mineralized Vein Structure

BRADENTON, FL -- (MARKET WIRE) – 12/13/07 -Silver Falcon Mining, Inc., (SFMI: OTC) -today released the results of an independent limited drilling program conducted on select areas of War Eagle Mountain, a gold property on which Silver Falcon Mining, Inc., has developmental and operating rights to 14 deep-shaft mines covering the Mountains' primary epithermal Gold and Silver-producing veins.

The independent drilling program was conducted by Donald Tully, P. engineer. "Five angle holes, totaling 684 meters (2,245 feet) were drilled in the Oro Fino area. Two angle holes, totaling 312 meters (1,025 feet) were drilled in the Keystone & Illinois Central area. Three vertical holes, totaling 209 meters (685 feet) were drilled in the Cow Cornice Basin area," wrote Mr. Tully.

Mr. Tully added, "The two holes that were drilled in the Keystone & Illinois Central and North Empire zones of the Central Vein system on the Mountain, approximately midway between the North and South shafts of the Poorman mine, struck extremely strong new veins. These structures showed mineable width indications of mineralization, with results of 1,000 ppm of Gold, or 660 g/t Gold (23.27 oz Gold/ton). It is concluded that the War Eagle Mountain property is an excellent exploration bet in a favorable geological environment for discovering additional and new deposits of precious metals, in addition to mining of the existing deposits."

Mr. Pierre Quilliam, President of Silver Falcon Mining, Inc. said "The vein structures on War Eagle Mountain clearly extend to depth, and without any evidence of diminishing ore values. The deepest veins discovered, so far, extend to the 610 meters (2,000 foot) level and show values of 64 g/t Gold (2.5 oz Gold/ton) over 2.7 meter (9-foot) widths. We are extremely pleased with the drilling results to date."

Silver Falcon Mining, Inc., is an exploration and development Company specializing in high-grade Gold and Silver mining properties in North America.
