## **SILVER FALCON MINING, INC. (SFMI) UPDATES DIAMOND CREEK MILL FACILITY GOLD PRODUCTION OPERATIONS**

**Murphy, ID- (MARKET WIRE) – 05/26/10** -- Silver Falcon Mining, Inc. (OTC:SFMI.OTCBB - News) announces that on May 25, 2010, the US Mine and Safety Administration (MSHA) issued its certification to the Company's employees. Employees and MSHA officials for two days initiated comprehensive training and skill set development which challenged the Company's employees. Each and every employee passed this required training mandated through MSHA.

The Company continues to move forward with necessary site grading for the installation of its security fence. Site improvements around the Diamond Creek Mill facility have been initiated, so the security fence can be constructed properly and within a timely fashion. The onsite camera became operational again after a weeklong outage due to an equipment failure. The Diamond Creek Mill heliport landing pad has been completed and paved for usage and pavement has been completed on primary and handicapped parking facilities.

Management, once weather and road conditions permit, will begin transport of the "Cumberland Lode" tailings. The historic grade of approximately 30,000 tons of these tailings had been assayed at 2.45 oz. /ton gold (ounces per ton gold). Management believes that this tailing grade remains consistent as to this point and time. Subsequently, new lab assays will be taken on these tailings, as well as, other mill feed to insure throughput grades prior to processing tailings at its Diamond Creek Mill facility.

SILVER FALCON MINING, INC. owns 100% of the "Cumberland Lode" claims, both mining and tailing rights. Mr. Pierre Quilliam, CEO, stated, "I'm very proud of the Company's employees who successfully completed the rigors of the MSHA qualification/certification. Again, SFMI continues to build on its success as it moves forward with great personnel. The mill will now be successfully operated by MSHA certified employees."
