Silver Falcon Mining, Inc. (SFMI): Sampling Effort Yields Surprising Result

BRADENTON, FL -- (MARKET WIRE) – 12/04/07 -- Silver Falcon Mining, Inc. (PINKSHEETS: SFMI) released the results of an independent random sampling study conducted on unmapped adits on War Eagle Mountain, a gold property. Silver Falcon Mining, Inc. has developmental and operating rights to 14 deep-shaft mines covering the Mountain's primary epithermal gold and silver-producing veins. War Eagle Mountain has produced approximately 415,000 oz. gold-equivalent to date, worth nearly \$ 270 Million.

The adits survey performed by D.A. Yeager and C.K. Ikona of Pamicon Developments, Ltd. states: "Limited mapping and samplings were carried out in various underground workings to try and identify any potential ore zones or areas warranting intensive exploration. Veins were sampled where they were obviously mineralized and no attempt was made to sample at the short intervals commonly used to block out ore reserves, as this type of sampling was beyond the scope of this program. However, two groups of samples taken were extremely interesting in their content:

**Keystone Adit: 63 g/t Gold (2.2 oz Gold/ton) 1,109 g/t Silver (39.1 oz Silver/ton)
Illinois Central Adit: 477 g/t Gold (16.9 oz Gold/ton) 3,180 g/t Silver(112.2 oz Silver/ton)"**

Mr. Pierre Quilliam, President of Silver Falcon Mining, Inc., added, "There are many areas on the properties that have not yet been explored and mapped. We were definitely surprised by the sampling done on the 'Keystone' and 'Illinois' areas. The results of this sampling, reinforces the feeling amongst geologists that War Eagle Mountain's mineralization is pervasive. Exploration efforts thus far created a better understanding where initial mining efforts should be focused, and which mines are more valuable."

Silver Falcon Mining, Inc. is an exploration and development Company specializing in high-grade gold and silver mining properties in North America. The mines of War Eagle Mountain are adjacent to the open-pit gold and silver mines of DeLamar Mountain and Florida Mountain, and are south of Boise, Idaho, in the Silver City Mining District.
