Silver Falcon Mining, Inc. (SFMI): Near-Surface Drilling Results Show Vast Zone of Mineralization

BRADENTON, FL -- (MARKET WIRE) – 12/06/07 -- Silver Falcon Mining, Inc. (PINKSHEETS: SFMI) released details of an independent drilling program conducted on War Eagle Mountain, a gold property. Silver Falcon Mining, Inc. has developmental and operating rights to 14 deep-shaft mines covering the Mountain's primary epithermal Gold and Silver-producing veins.

A total of 49 holes were drilled by NERCO, Inc. The holes ranged from 70-feet in depth, to 700-feet in depth, with samples taken at 5-foot intervals, and were intended to test near-surface average mineralization. The drilling used reverse circulation methods and was not designed to provide results similar to blocked-out or core drilling methods, which yield a detailed analysis covering the entire length of the core.

"We are definitely pleased with the exploration and drilling results that have been obtained thus far in the area. Hole 'W14' indicated nearly 445 vertical-feet of mineable-grade ore at .18 to .85 oz Gold/ton; while, hole 'W40' returned nearly 380 vertical-feet of .11 to .45 oz Gold/ton. The remaining holes indicated yields from .24 to .88 oz Gold/ton over scattered intervals. We look forward to defining the reserves at these locations with additional and more detailed drilling," said Mr. Pierre Quilliam, President of Silver Falcon Mining, Inc.

Silver Falcon Mining, Inc. is an exploration and development Company specializing in high-grade Gold and Silver mining properties in North America.
